

codutti

COMPANY PROFILE 2020

EMOTIONAL

OFFICE

Your office shows who you are, what your journey is and your principles are. You have the opportunity to express yourself, acting in a workspace where comfort, technology and functionality make you in focus on important things of everyday working life.

OPPORTUNITY

TO CHOOSE THE BEST PARTNER

We at Codutti have been both craftsmen and industrialists since 1954.

We create design solutions for the highline office, paying the attention for the detail we have learned for almost Seventy years of experience with the made in Italy production and design.

BEGINNING

OF A SUCCESSFUL STORY

1954

August the 1st

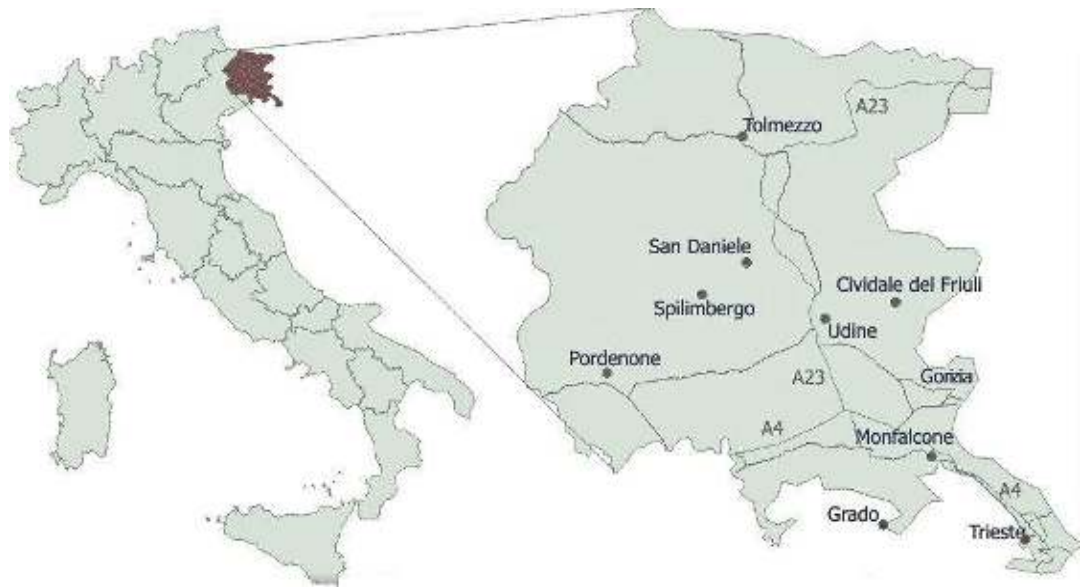

North-East of Italy

3 Brothers

Inventiveness

Ability to turn imagination into creativity & creativity into reality

Founding a workshop in a small town is not difficult thanks to the booming economy of the post-war period, but turning it into a multinational one requires passion, dedication and extraordinary perseverance.

The first occasion to test their skills was the built of Raffaello and Michelangelo ships, in the middle Sixties: initiative and flexibility permit the Codutti Brothers to produce real artworks as counters, comfortable seats and futuristic shape upholstery for these luxury “palaces on water”.

This was the first of a series of exciting channenges: the opening toward foreign markets, the transition to a joint-stock company, the gradual definition of an original brand’s design recognizable all over the world, the growing experience in contract sector furnishing skycrapers, bank branches, headquarters, business centres and government offices in major international projects.

NOWADAYS

CHALLENGES

These are the years of transition from a family business to a company with international partners.

Today the company boasts 50 employees and 2 plants over an area of 10,000 square meters.

The company enjoys solid cooperation with the best and globally renowned Italian suppliers, which help in stepping forward into the future in constant search for excellence.

The high levels of product customization are the main added value that turns the already prestigious Codutti office into an absolutely exclusive environment where tailor made care emerges from every detail.

Codutti is present in the major global markets through the export of high quality executive furniture. An offer based on dozens of collections with a unique and immediately recognizable design that meets the needs of even the most demanding customers in every part of the world.

Kant

DUALISM

BETWEEN CRAFTSMANSHIP
AND INDUSTRIALIZATION

The high level of quality of Codutti products originates from the artisan care of its processing. All leather parts are handmade according to tradition. This allows Codutti to dedicate the necessary care and attention to each individual piece so that it can boast the Codutti trademark. On the other side the wood and metal parts are managed by using numerical control machines that guarantee maximum precision in manufacturing and maximum reliability in the result. We at Codutti are craftsmen and industrialists at the same time, the perfect mix to give you a unique appealing office that excites you day after day.

A stack of five decorative panels, likely for a wall or ceiling, showing different textures and colors: a beige textured panel, a grey smooth panel, a dark brown smooth panel, a medium brown smooth panel, and a light wood-grained panel. A patterned fabric is draped over the top of the stack.

The President Alberto Bertoli

Alberto Bertoli

Materials such as wood, leather, metal, glass and stone are enhanced in their essence through skilful processing that bring forth their intrinsic characteristics and qualities. 70 years of experience and know-how are focused in every single detail with the specific aim of satisfying the client with a product that exceeds its expectations.

DISTINCTION

PHILOSOPHY

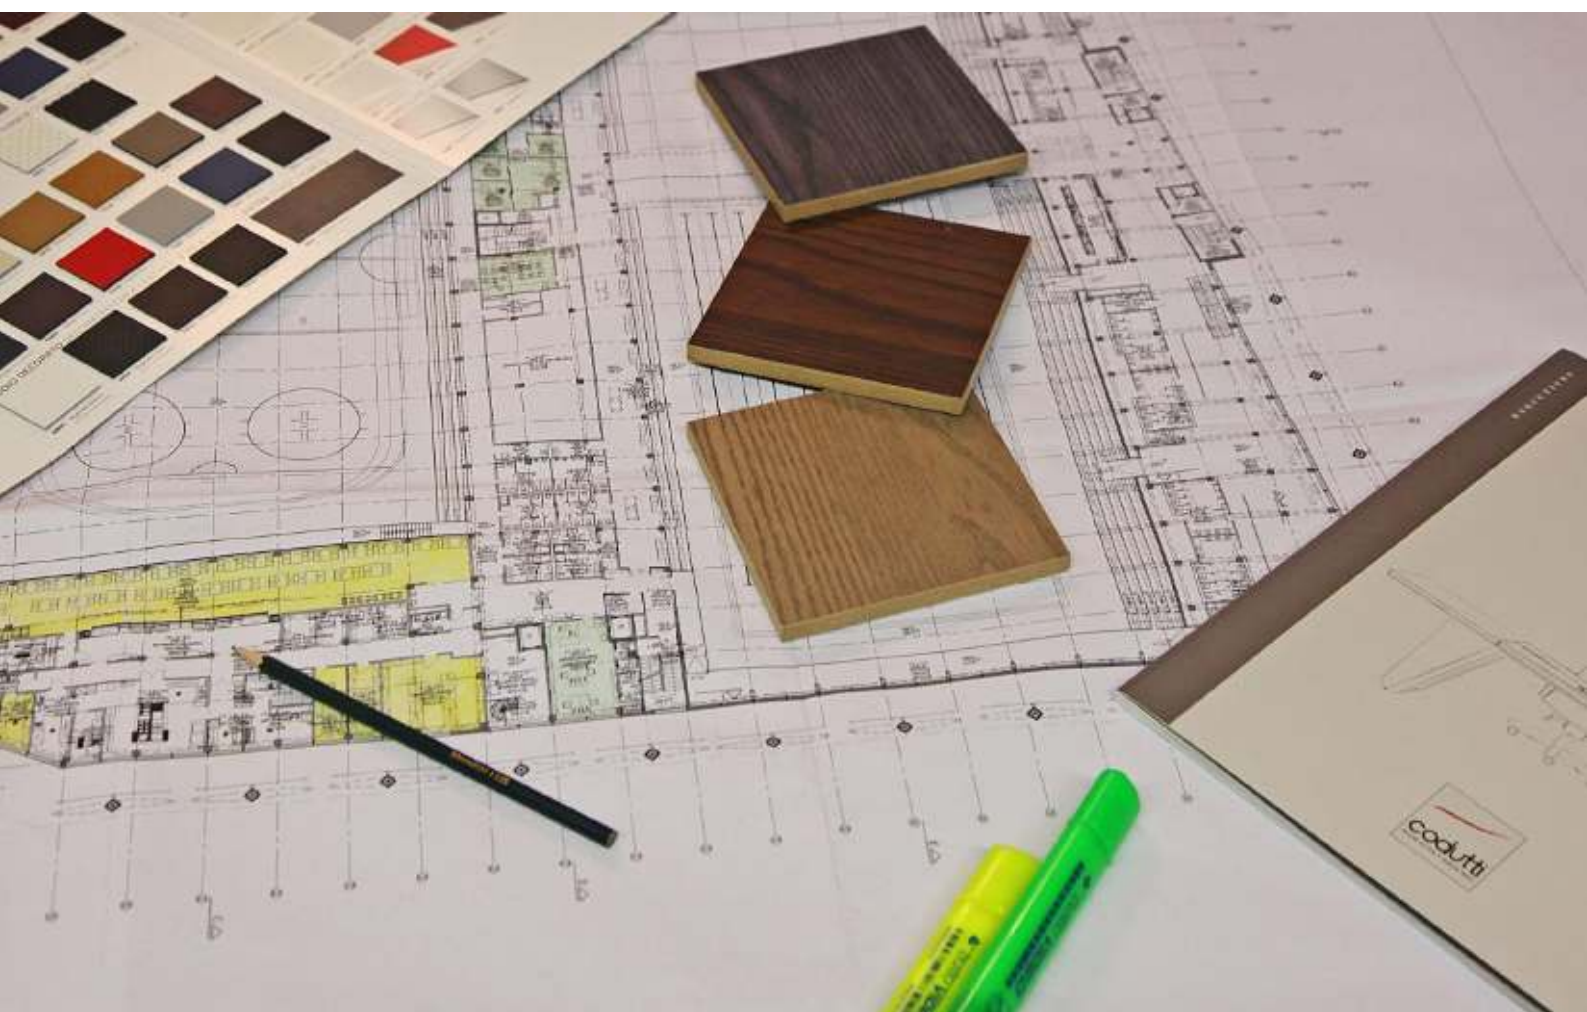

Be different means follow the flow of your passion, being clear your core principles, acting with foresight and imagination.

Codutti distinguish itself in the ability of recognizing customers needs and finding creative solutions with results behind expectation. The internal organization flexibility ensure the customer to be supported by skilled specialists since the first step of the project.

BY YOUR SIDE

STEP BY STEP

Codutti's Technical Office is always available to the client for the manufacturing of functional furnishing solutions without neglecting both the particular operational requirements and the aesthetic and stylistic characteristics of the environment to be furnished. The preparation of technical drawings and graphic layouts for the project allows clients to make a timely and conscious choice of furniture, with the certainty of being able to rely on solutions specifically designed to suit the most specific and unusual needs.

The Customer Care Office is always at customer side in order management, creating an efficient co-operative relation between the Company, the sales network and the customers.

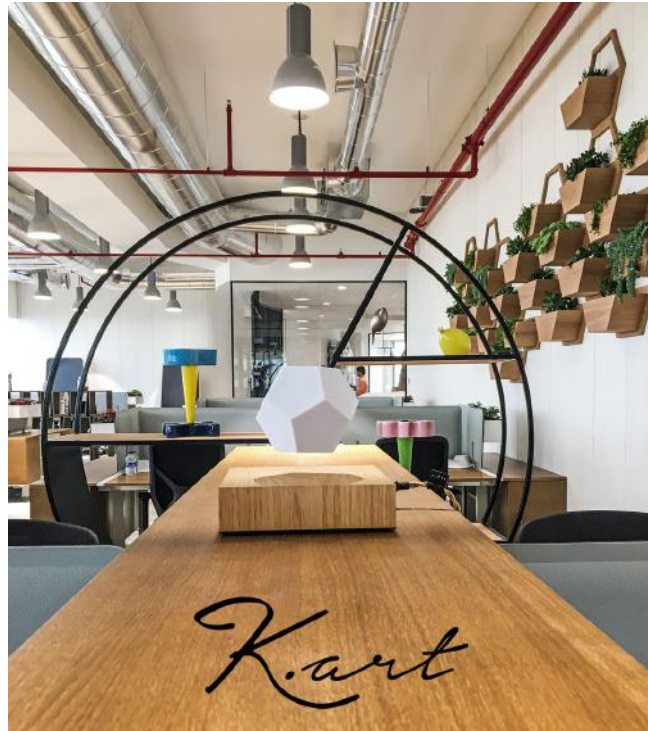

TAILOR MADE PROJECT

Lots of important establishments from all over the world have tested Codutti in custom projects, achieving the best results both in executive and operative workspaces. A dedicated Research & Development office is in charge for fully understand the customer needs and for make them come true in a unique, creative and extraordinary result. Every single piece of furniture can be reprojected following customer requirements, coordinating with accessories, wall coverings, flooring, frameworks, lighting, upholstery: the whole interior environment can be tailor made and can perfectly reflect the customer style.

NEW FRONTIERS

WAITING FOR 2021

WEB

It is pleasant to work in an environment designed not only from a functional point of view. Forms that recall to the house, to the school. Objects that do not detach you from the rest of your world.

No more modular and insulating work, but integrated and socializing.

This is the basis of an open project from a formal and mental point of view.

Air and light without barriers, volumes that allow sharing and intimacy.

CLOUD

Designing a workspace means entering the intimacy of those who use it. Imagine his dreams, share his successes.

The office is not just a place, a space, a set of objects. It is the philosophy of who lives it, it is its dress, its fortress. And 'what he built, perhaps the first step, perhaps the goal. History or the future. In any case it is him, at that precise moment.

Designing a work space means designing the emotion of a moment.
